Chemistry
Paper 1
APRIL 2024
2 ¾ hours

UGANDA ADVANCED CERTIFICATE OF EDUCATION
S.5 CHEMISTRY TEST TWO
Paper 1
2 ¾ hours

INSTRUCTIONS TO CANDIDATES:

- Answer **all** questions in section **A** and **any six** questions in section **B**
- All questions must be answered in the spaces provided
- The Periodic Table, with relative atomic masses, is supplied.
- Mathematical tables(3 – figure tables) are adequate or non-programmable scientific electronic calculators may be used
- Illustrate your answers with equations where applicable.

Where necessary, use the following:

- Molar gas constant R = 8.31 JK^{-1} mol^{-1}
- Molar volume of a gas at s.t.p is 22.4 litres.
- Standard temperature = 273 K
- Standard pressure = 101325 N m^{-2}

For Examiner's Use Only																
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	Total

SECTION A

1. (a) State Graham's law of diffusion. (01 mark)

……

……

(b) A certain volume of oxygen diffused through a porous membrane in 120s. Under the same conditions, the same volume of a gas **X** diffused in 112s. Calculate the formula mass of **X** (03 marks)

……

……

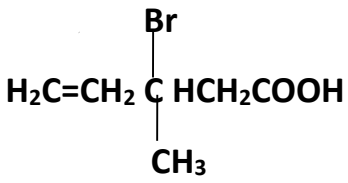
……

……

(c) State one application of diffusion of gases (01mark)

……

2. An organic compound R has a structure;



(a) Name any three functional groups present in **R**. (03 marks)

……

……

……

(b) Name the following organic compounds

(i) CH_3CH_2Br (01 mark)

……

(ii)  (01 mark)

……

(iii)  (01 mark)

……

b) Write the structural formula of each of the following organic compound

(i) 2,3-dimethylbutane (01 mark)

……

(ii) 3-bromo-2-chloropentane (01 mark)

……

(iii) 4-ethyl-3,4-dimethylheptane (01 mark)

……

3. (a) What is meant by **first electron affinity**? (01 mark)

……

……

……

(b) Write an equation for first electron affinity of oxygen. (01 mark)

……

(C). The first electron affinity of oxygen is exothermic while the second electron affinity is endothermic. Explain (03 marks)

……

……

……

……

……

……

4. The combustion of a hydrocarbon **P** gave 8.8g of carbon dioxide and 4.5g of water, if the molecular mass of **P** is 58. Determine the
(a) Empirical formula of **P**

……

……

……

……

……

……

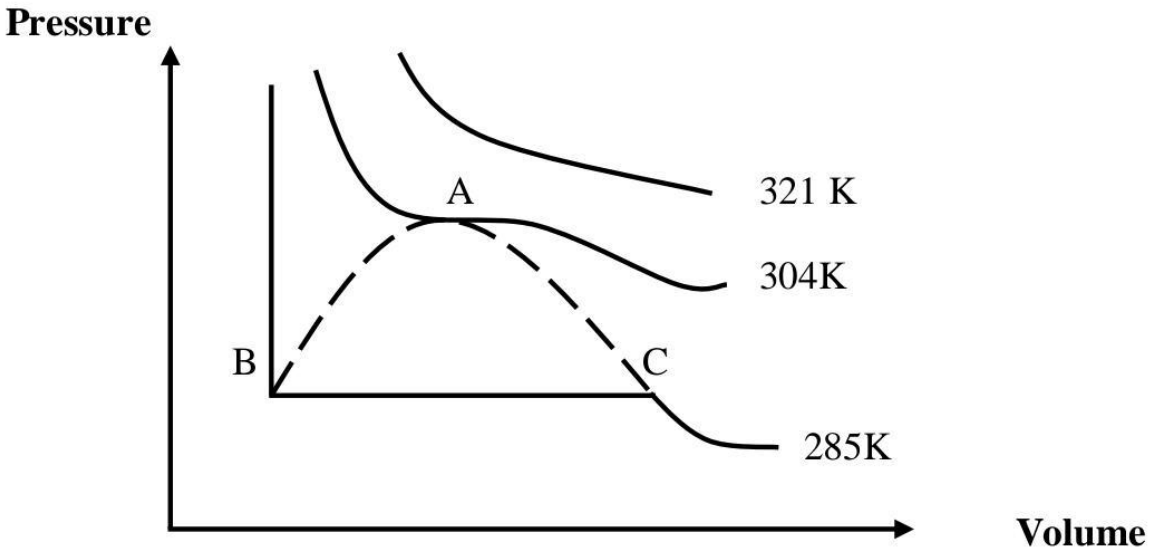
(b) Molecular formula of **P**

……

……

……

5. (a) The diagram below shows the isothermals of a gas.



(i) What is the critical temperature of the gas. (01 mark)

……

(ii) Which isothermal almost represents an ideal gas. (01 mark)

……

(iii) What does the region ABC represent. (01 mark)

……

(b) State two conditions for liquefying a gas. (01 mark)

……

……

6. Gas **X** has a vapour density of 2.615gdm^3 at 25^{0}c at a pressure of 101Pa. Determine the molecular mass of gas **X**

……

……

……

……

……

b) In another experiment gas **X** occupies a 225cm^3 vessel at 7^{0}c and pressure of 4.8 x 10^5 Pa. Determine then number of moles of gas **X** present under those conditions

……

……

……

7. Complete the following equations for nuclear reactions.

a. $^{239}_{94}Pu + {}^{4}_{2}He \longrightarrow$ …… + $^{27}_{13}Al$ (01 mark)

b. $^{250}_{98}Cf$ + …… $\longrightarrow$ $^{257}_{103}Lw$ + $4^{1}_{0}n$ (01 mark)

(b). In an experiment, the rate of radioactive decay of protactinium decreased to 25% in 54 minutes. Calculate the half-life of protactinium.(03mks)

……

……

……

……

8. (a) What is meant by the following terms

(i) A **d-block element** (01 mark)

……

……

(ii)An **orbital** (01 mark)

……

……

b) Write the electronic configuration of the following

(i) Boron (01 mark)

……

(ii) Aluminium (01 mark)

……

(i) Cobalt (01 mark)

……

9. The table below shows the first four successive ionisation energies of elements **A, B, C** and **D**

Element	**1st I.E (KJmol^{-1})**	**2nd I.E (KJmol^{-1})**	**3rd I.E**	**4th I.E**
A	800	2400	3700	25000
B	900	1800	14800	21000
C	500	4600	6900	9500
D	1090	2400	4600	6200

(a) With reasons, state the group of the periodic table to which the element A belongs.

Group (01 mark)

……

Reason (02 marks)

……

……

(b) State the formula of the oxide of B. (01 mark)

……

(c) State the elements that belong to the same group in the periodic table. (01 mark)

……

SECTION B

Attempt any *six* questions from this section.

10. (a) (i) Distinguish between an **ideal gas** and **a real gas** (02 marks)

……

……

……

(ii) State two properties of an ideal gas (01mark)

……

……

(b) Explain how liquefication of a gas can be affected by

(i) Pressure. ($1\frac{1}{2}$ marks)

……

……

……

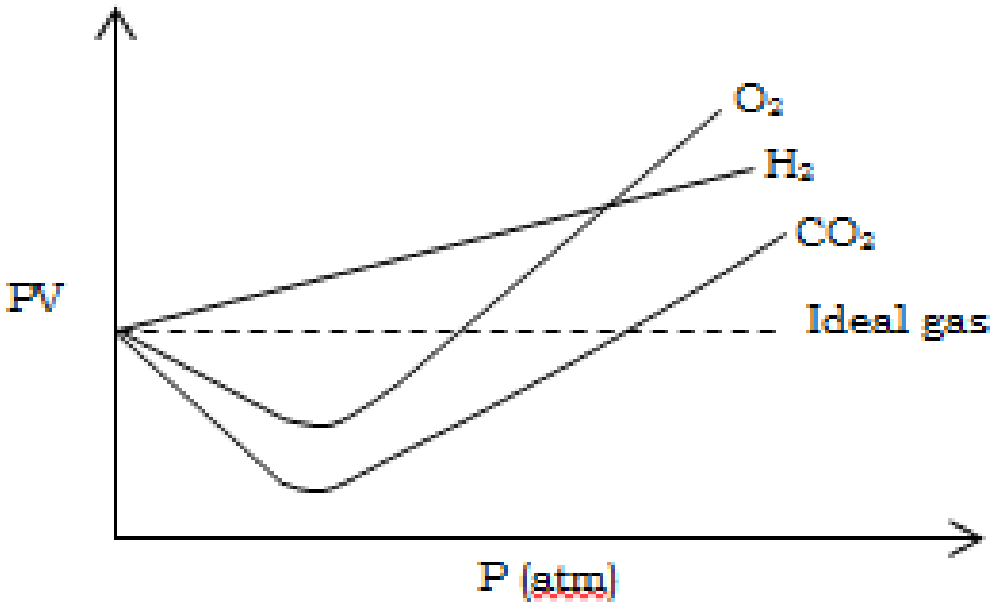
(ii)Temperature (02 marks)

……

……

……

(c). The curves below show deviations of some gases from the ideal behaviour



(i) State why hydrogen shows a small deviation from the ideal behaviour compared to other gases. (01 mark)

……

……

……

(ii) Compare the deviations of oxygen and carbon dioxide from the ideal behaviour and give a reason for your answer. (1½ marks)

……

……

……

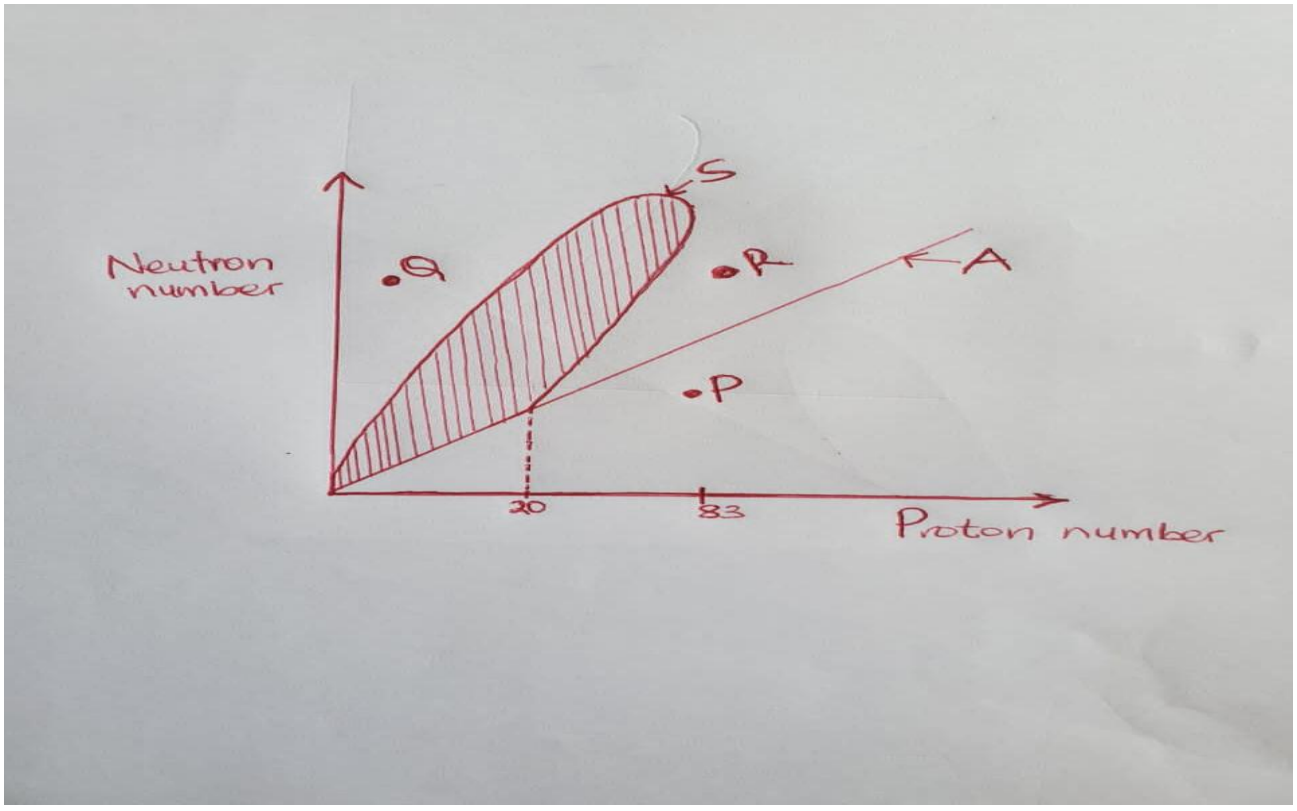
……

11. (a) State two factors affecting stability of a nucleus of an atom. (02mks)

……

……

b) Below is a graph of number of neutrons against number of neutrons against number of protons for different nuclei



Identify (i) region **S**…… (01 mark)

(ii) line **A**……(01 mark)

c). State how the following nuclide can gain stability

(i) **Q** (01 mark)

……

……

(ii) **R** (01 mark)

……

……

(iii) **P** (01 mark)

……

(d) State two properties of a stable nuclide (02 marks)

……

……

12. Explain the following

(i) the first ionisation energy of magnesium is higher than that of aluminium. (03 marks)

……

……

……

(ii) the atomic radius of sodium atom is **0.156nm** while the ionic radius of sodium ion is **0.095nm**. (03 marks)

……

……

……

(iii) Potassium atom has a larger atomic radius than lithium (03marks)

……

……

……

13 (a) Define a colligative property (01 mark)

……

……

(b) (i) State four colligative properties (04 marks)

……

……

……

……

(ii) State two limitations of a colligative property. (01 mark)

……

……

C) The lowering of vapour pressure of a solution of 108.2g of a substance **X** in 1000g of water at 20°C is 24.790kPa. The vapour pressure of water at 20°C is 2.338kPa. Calculate the relative molecular mass of **X** (03 marks)

……

……

……

……

14. (a)State Dalton's law of partial pressure of gases. (01 mark)

……

……

(b) What is meant by the following terms?

(i) Partial pressure of a gas (01 mark)

……

……

(ii) Mole fraction of a gas (01 mark)

……

……

(c) **12.0g** of nitrogen, **0.4g** of hydrogen and **9.0g** of oxygen were put in a **1litre** vessel at a pressure of **22.4atm**.calculate the partial pressure of the respective gases present in the vessel. (06 marks)

……

……

……

……

……

……

……

15. (a) What is meant by the term atomic radius. (01mark)

……

……

(b)Describe how atomic radius varies

(i) Down a group. (04 marks)

……

……

……

……

……

……

……

……

(i)Across a given period. (04 marks)

……

……

……

……

……

……

……

16. (a). Define the term

(i) Radioactivity. (01 mark)

……

……

……

(ii). **Half life** (01mark)

……

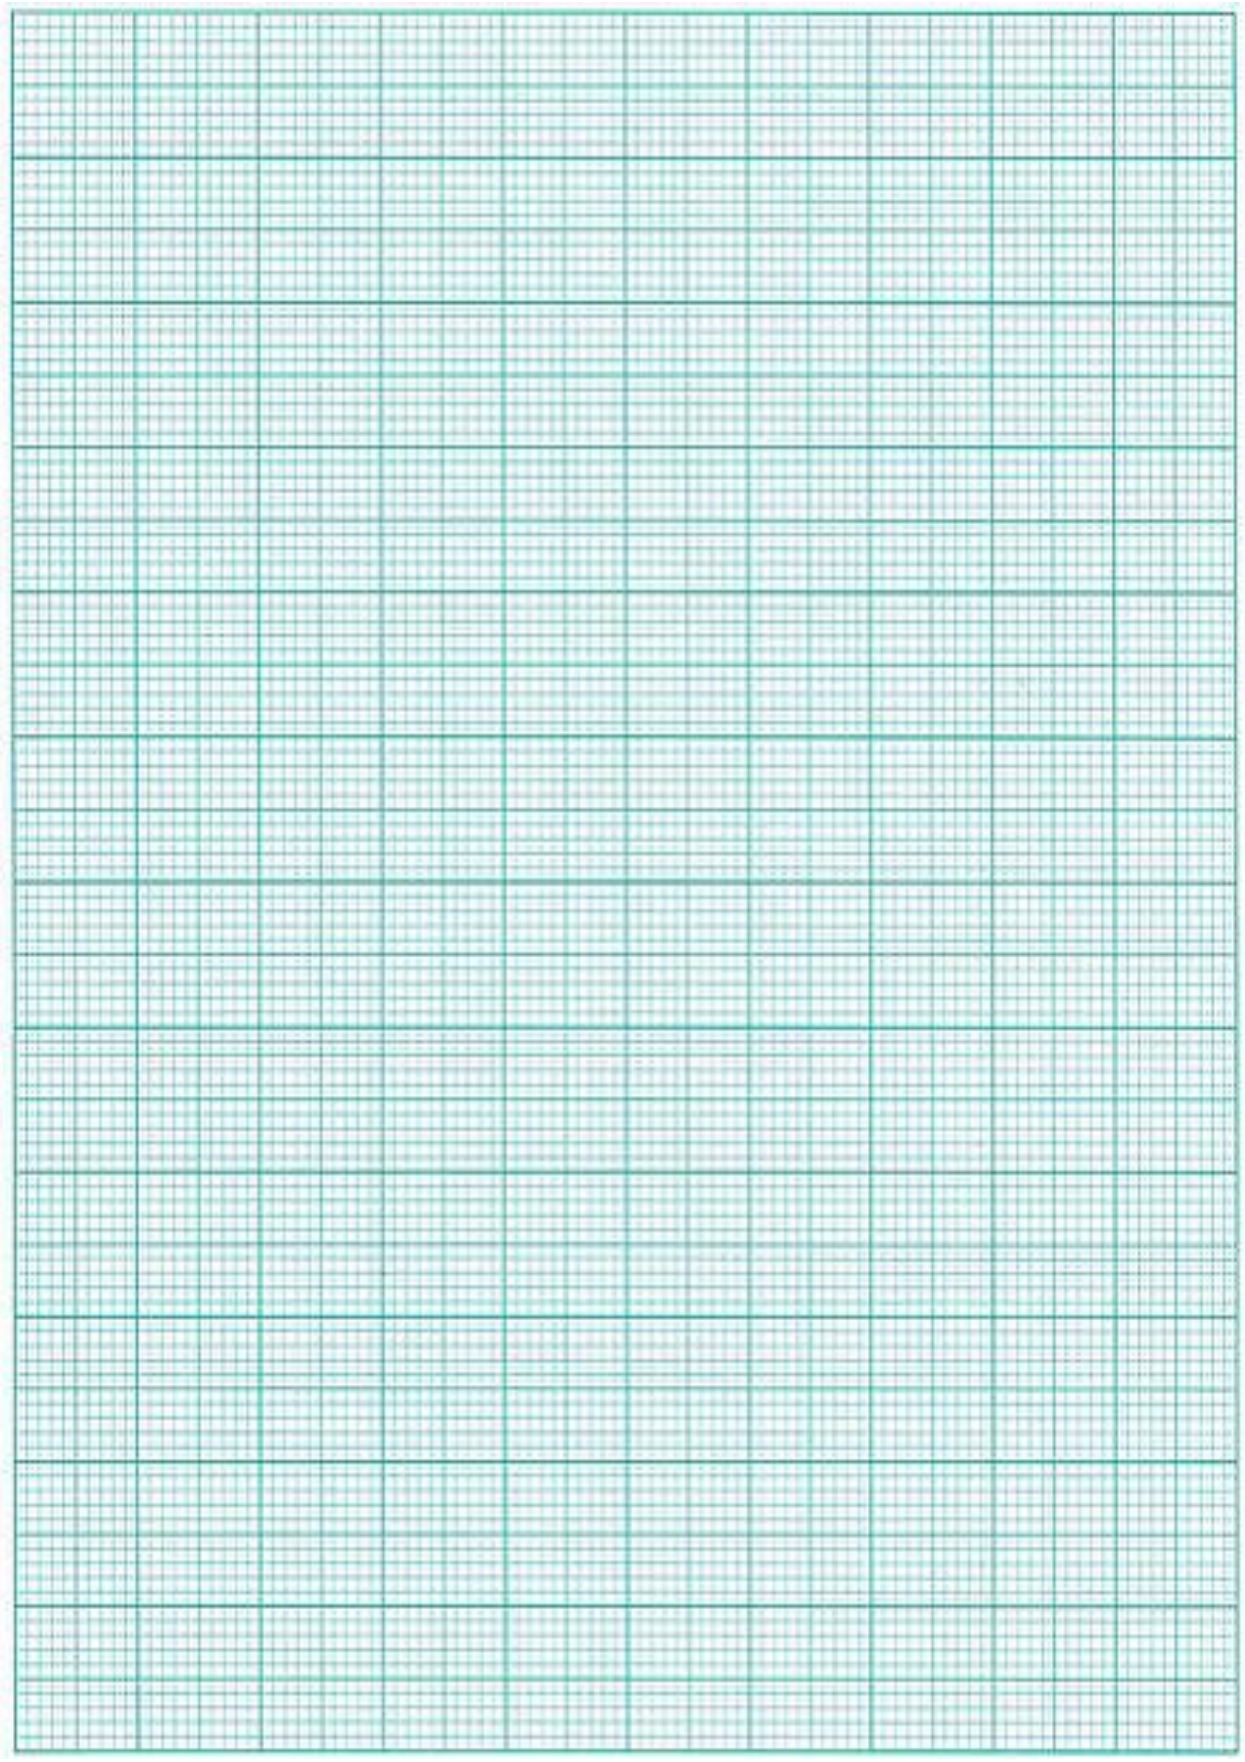
……

……

b) The table below shows how the mass of radioactive substance **R** varies with time.

Mass of R (g)	60.0	38.5	26.0	17.2	11.1
Time (minutes)	0	40	80	120	160

Plot a graph of mass of R against time. (03 marks)



(ii).Use your graph to determine the **half-life** of **R**. (01 mark)

……

……

……

……

(iii).Calculate the **radioactive decay constant** of **R**. (01 mark)

……

……

……

(c) Differentiate between nuclear fission from nuclear fusion. (02 marks)

……

……

……

……

17. (a) What is meant by isomerism (01 mark)

……

……

……

(b) Write short notes on the following types of structural isomerism.

(i) Position isomerism (02marks)

……

……

……

(ii) Functional group isomerism (03 marks)

……

……

……

……

(iii) Chain isomerism (03 marks)

……

……

……

……

18. (a) Define the term first ionisation energy. (01 mark)

……

……

……

(b) Write an equation for the first ionisation energy of magnesium.(01mk)

……

……

(c). State how the following factors affect the value of ionisation energy of an atom or ion.

(i) Electronic configuration of the atom or ion. (01 mark)

……

……

……

(ii) Nuclear charge (01 mark)

……

……

……

d) The table below shows the variation in first ionisation energies of elements in group (VII) of the periodic table

Element	**F**	**Cl**	**Br**	**I**
First ionisation energy(KJmol^{-1})	1681	1255	1142	1007

(i) State the trend in first ionisation energy of the elements. (01 mk)

……

(ii) Explain your trend in (c) (i) above. (04 marks)

……

……

……

……

……

……

END.

WELCOME TO S5 CHEMISTRY CLASS 2024.
